

## DRIVERS OF DISPLAY CARS ADMITTED FREE OF CHARGE

The **Historic Sports and Racing Car Association of NSW**, in conjunction with the **Australian Racing Drivers' Club**, is organising the **Sydney Retro Speedfest** at Sydney Motorsport Park on 3-4 May 2014.

The inaugural **Speedfest** will be a race meeting with a difference, designed to showcase the best of classic racing with lots of track time in varying formats and lengths of races. The meeting will be conducted on the Gardner (traditional Grand Prix) circuit. Seven categories will be featured, each being allocated a qualifying session and four races over the two days, including a longer trophy race on the Sunday afternoon. In addition a large collection of historic Formula One cars will be on display and participate in demonstration hot-laps.

The event promises to be a showcase of the best of competition cars. Entries will include examples of notable racing marques, including Alfa Romeos, Austin Healeys, BMWs, Camaros, Lotus, Minis, Cobras, Datsuns, Falcon GTs, Ferraris, Toranas, Jaguars, Lancias, MGs, Morgans, Mustangs, Nissans, Porsches, Sierras, Sprites and Triumphs.

To add to the classic flavour of the event, the organisers extend an open invitation to selected car clubs to display members' cars on Sunday 4 May. Arrangements have been made for a dedicated area to be set aside along Pit Straight where full viewing of the racing can be enjoyed. The area will provide easy access to the covered Grandstand, and also to the competitors' paddock and air-conditioned viewing areas above the pit complex.

Drivers of display cars will be admitted free to the event on Sunday 4 May. Passengers in display cars are invited to take advantage of the early-bird discount tickets which may be ordered by contacting the ARDC on 02 9672 1000.

The organisers look forward to your club's participation in the event and assure all those who attend will enjoy an action-packed and memorable day.

An advertisement for the event, the system of registration and arrangements for vehicle passes are explained in separate attachments, which are suitable for circulation amongst your members.
